Professional Summary

Python Backend Developer with hands-on experience building scalable REST APIs, real-time messaging systems, and microservice architectures using Django and DRF. Delivered 2+ full-stack projects with JWT auth, WebSocket-based chat, Celery task queues, Nginx reverse proxy, Dockerized multi-service deployments, and cloud integrations (AWS S3, Cloudinary). Skilled in Pytest, Tox, and CI/CD workflows via GitHub Actions.

Technical Skills

Languages: Python, JavaScript, SQL

Frontend: React, Tailwind CSS, Bootstrap

Frameworks: Django, Django REST Framework, FastAPI

Databases: PostgreSQL

Realtime: Django Channels, Redis, WebSockets, Celery

Cloud: AWS S3, Cloudinary, Firebase Cloud Messaging

DevOps: Docker, Nginx, Gunicorn, Daphne, GitHub Actions (CI/CD)

Testing: Pytest, Tox, Coverage.py

Tools: Git, Postman, REST APIs, JWT, OOP, MVC, Microservices, K3s Kubernetes

Internship Experience

Python Full Stack Developer Intern — Bridgeon Skillversity

Jun 2025 – Present

- Built 20+ REST API endpoints with JWT authentication using Django and DRF, supporting multiple user roles across 2+ project modules.
- Optimized backend data workflows using PostgreSQL and Redis; handled API testing and validation across 20+ endpoints using Postman.
- Containerized and deployed applications using Docker and Nginx; maintained version control and CI/CD pipelines via Git and GitHub Actions.

Projects

PC-Craft: PC Customization Platform

Django, DRF, React, FastAPI, PostgreSQL, Redis, Django Channels, Celery, Docker, K3s, AWS EC2, Nginx, Three.js

- Architected a full-stack PC customization platform with role-based access for 3 user types (Users, Workers, Admins), managing the complete order lifecycle end-to-end.
- Engineered a real-time messaging system using Django Channels, Redis, and WebSockets with JWT auth for live worker-client communication.
- Designed a standalone AI microservice using FastAPI and Gemini API, delivering budget-based PC component recommendations.
- Dockerized 5 services (backend, realtime, AI microservice, Celery worker, Nginx) and orchestrated deployment on AWS EC2 with K3s Kubernetes.
- Automated quotation PDF generation, integrated AWS S3 and Cloudinary for media storage, and configured Nginx for SSL termination and API routing.
- Integrated Three.js to deliver an interactive 3D PC builder with real-time component swapping and visual preview — a core UX differentiator of the platform.

Technox E-commerce Platform

Django, DRF, React, PostgreSQL, Razorpay, JWT

- Developed a full-stack e-commerce platform with product management, cart, wishlist, and order workflow across 2+ user-facing modules.
- Secured 15+ RESTful API endpoints using JWT auth and DRF; integrated Razorpay payment gateway for end-to-end transaction processing.
- Designed a responsive React + Tailwind CSS frontend with reusable components; managed relational data with optimized PostgreSQL queries.

Education

Master of Computer Applications (MCA) — (Distance Mode)

2026 – Present

Jain University, Bengaluru

Bachelor of Computer Applications (BCA)

2022 – 2025

University of Calicut, Kerala
